

Data Strategies Int'l is a leading provider of large-scale data migration and conversion services to Fortune 500 and Global 1000 companies that need to upgrade from old technologies to new ones.

In the last 20 years of experience with media conversion and data migration services, Data Strategies Int'l has developed highly efficient processes and tools to perform the migration of documents archived by most systems to newer document archive systems. We are vendor neutral and market our services, directly, through software vendors, hardware vendors, and system integrators.

The company's off-line migration services are unique in that they use technologies and processes that do not impact the client's day-to-day operation. Our off-line approach allows us to perform large-scale data migrations in the shortest time and the most cost effective way. The company's migration tools support most popular archiving products. We always provide our customers with comprehensive audit reports of the migration process. Moreover, we protect the data we process by adhering to strict security procedures, including chain-of-custody and, when needed, data encryption.

The same services are now available in Europe through its subsidiary Data Strategies Int'l Europe S.r.l.

DATA STRATEGIES INTERNATIONAL EUROPE

Innovation in computer hardware and software industries continues at a rapid pace, usually yielding increased processing power and storage capacity at a lower cost.

These continuous improvements create perpetual demand for applications that enable migration from old technologies to new ones.

Data Strategies Int'l Europe S.r.l., an innovative solutions provider, is responding with new technologies and products to address that growing need.

SERVICES

WE BELIEVE IN BEING A GOOD CORPORATE AND WORLD CITIZEN

SERVICE THROUGH EXCELLENCE

Our goal is to provide through innovation high quality solutions to our customers, at a fair price, while providing uncommon value and outstanding customer service.

We believe that our customers are our partners and we consider it a privilege to develop a relationship with them. Most of all we believe that they deserve to be treated with honesty and unmatched professional respect.

01

DOCUMENT MIGRATION

- Document Images Migration**
Extraction from Legacy Systems
Conversion to Target System
Metadata/Indexing Conversion
- Text Documents Migration**
Extraction from Legacy Systems
Conversion to Target System
Metadata/Indexing Conversion
- Check Images Migration**
Extraction from Legacy Systems
Conversion to Target System
Metadata/Indexing Conversion
- File Format Conversion**
Format Conversion (e.g. TIFF to PDF)
Copybook Based Conversion
Line Data to XML Conversion

02

APPLICATION SPECIFIC CONVERSION & MIGRATION

- Backup Tapes Conversion**
Media Conversion
Catalogue Creation
Backup Data Consolidation
Backup Data Segregation
Backup Application Conversion
- Email Data Migration**
Media Conversion
Application Conversion
- PACS Data Migration**
Media Conversion
Vendor Migration
- VTS System Conversion**
Media Conversion
VTS System Conversion
VSM System Conversion
- Data Transcription (Oil Industry)**
Seismic Field Data
Seismic Processed Data
Well-log Data

03

DATA ARCHIVING SERVICES/SYSTEMS

- Documents Archiving (Re-purposing)**
CD-ROM, DVD & Tape
Cataloging, Indexing
- Virtual Volume Deep Archive**
Archive Creation Service
Archive Management System
Licensing

04

DATA MIGRATION FOR MAINFRAME MODERNIZATION

- Tape Data Migration**
TMS Data Base Analysis
Datasets Migration & Conversion
Data Volumes Migration (VTL)
Migrated Archive DB Creation
- Legacy Data in the Cloud**
Support via Micro Focus ECS

05

TAPE LIBRARY MAINTENANCE

- Label & Initialization**
New Media Labeling & Initialization
In-use Media Label Verification
- Media Conversion**
Cloning & Duplication
Volume Stacking
Dataset Stacking (Selective)
- Library Audit**
TMS Data Base Validation
Media Aging Analysis
Problem Media Detection
Media Refreshing
Conversion Planning
- Media Analysis**
Non-destructive Media Analysis
Security Erasing & Degaussing
Re-certification & QA Analysis
- Data Recovery**
Data Recovery from Magnetic Tapes
Data Recovery from Optical Platters
